Highway Superintendent Report July 2026

General maintenance on equipment

Ditching throughout the town

Patching potholes throughout the town

Chip Sealed and finished paving Smith Rd

Mowing and weedeating cemeteries , mexico point park, court , town office

Picking up trash throughout the town

Highway Superintendent

A handwritten signature in black ink, appearing to be "J. Miller", written in a cursive style.

Town of Mexico Board Meeting

August 10, 2026

Historian Report

July-August 2026

Museum info:

- Rotating items into front window to show some of the museum collection.
- We've closed the museum for a short time to rearrange the displays a little and to discover what we haven't had time to look at. There are many treasures in that little building. Having some framed and will be putting them out for display.
- Window has been replaced and the door fixed. Exterior painting is now complete.
- Will reopen in September.

Historian:

- Published 4 historic video of Mexico on the Town website with help from IHeart. Lots of good comments about them on various Facebook pages.
- July 14 Main Street walking tour was held in the Mexico Arts, Culture & Event Center (old Grace Church) instead of on Main Street due to the heat that night. About 25 in attendance.
- Responded to inquiries from the public. Some requests for info date back to early 1800s.
- Sorting old records found in the museum.

Community Park Report July 2026

Mow park

Pick up trash

Tear out old dugouts

Took out pitchers mound on minors field

Park Grounds Manager

A handwritten signature in black ink, appearing to read "P. M. A.", is written below the title "Park Grounds Manager".

RESOLUTION ADOPTING THE TOWN AND VILLAGE OF MEXICO COMPREHENSIVE PLAN
MEXICO TOWN BOARD RESOLUTION NO. _____

At a regular meeting of the Town Board of the Town of Mexico, held on August 10, 2026, at the Town Offices at 64 S Jefferson Street in the Village of Mexico at 7:00 pm, the following resolution was offered by Councilor _____, who moved its adoption, and seconded by Councilor _____:

WHEREAS, the Town and Village of Mexico Comprehensive Plan contains updated census information, new data, up-to-date maps, long-term vision and goals, and a series of recommended strategies to enhance growth and development in the Town and Village and an action Plan to guide implementation of programs; and

WHEREAS, the Town and Village of Mexico Comprehensive Committee received significant public input in its development of the Town and Village of Mexico Comprehensive Plan; and

WHEREAS, the Town and Village of Mexico Board held a joint public hearing on the Plan on June 22nd, 2026 and continued on July 22nd, 2026; and

WHEREAS, the Town Board and Village Board of Trustees have completed SEQRA review and determined that the proposed action of adopting the Town and Village Comprehensive Plan is a Type 1 Action and will not have a significant adverse environmental impact;

WHEREAS, the proposed Comprehensive Plan was referred to the Oswego County Planning Board for review pursuant to General Municipal Law § 239-m on July 14th, 2026; and

WHEREAS, a duly noticed public hearing on the proposed Comprehensive Plan was held on June 22, 2026 and July 22nd, 2026 at which time all interested persons were given the opportunity to be heard; and

WHEREAS, the Board has fully considered all public comments, the recommendations of the County Planning Board, and the requirements of NYS Town Law § 272-a ;

NOW, THEREFORE, BE IT RESOLVED, that the Town Board of the Town of Mexico hereby adopts the Comprehensive Plan entitled Joint Town and Village of Mexico Comprehensive Plan, June 2026 as the official Comprehensive Plan for the municipalities; and

BE IT FURTHER RESOLVED, that this Plan shall serve as a general guide for the land use, development, and conservation of the Town and Village of Mexico, NY; and

BE IT FURTHER RESOLVED, that the Town and Village Clerks are hereby directed to file a copy of the adopted Comprehensive Plan in the office of the Town and Village Clerk and to distribute copies as required by NYS law.

The foregoing resolution was duly put to a vote of the Town Board and resulted as follows:

Town of Mexico Annex.pdf (~170 KB) mitigation fact sheet 2026.pdf (~419 KB) Sample Mitigation Plan Adoption Resolution.docx (~15 KB)

Hello, Supervisor Behling,

Good news: The county's Multi-Jurisdictional Hazard Mitigation Plan has received conditional approval from New York State and the Federal Emergency Management Agency (FEMA). The next step is approval by your municipality's governing board, with a signed copy of the resolution forwarded to me so that I can send it onto the state. We hope your board is able to approve this in the next couple of months.

I'm happy to attend to explain the project. I can also meet with you separately, if you would like.

Once fully approved by FEMA, this plan will allow you to apply for mitigation funding from the federal government as well as become compliant with the Disaster Mitigation Act of 2000, which requires municipalities to have such a plan.

I've attached a sample resolution and your municipality's annex. We can update your municipality's contact information if needed. The full plan is available on the county website:

https://www.oswegocountyny.gov/departments/public_safety/emergency_management/hazard_mitigation.php

I'm looking forward to working with you!

Terry

Terry.bennett@oswegocountyny.gov

Name of Jurisdiction: _____

**RESOLUTION
TO AUTHORIZE THE ACCEPTANCE AND ADOPTION OF THE
2026 OSWEGO COUNTY MULTI-JURISDICTIONAL
HAZARD MITIGATION PLAN UPDATE**

WHEREAS the Town/City/Village of _____ recognizes the threat that natural hazards pose to people and property within (local government); and

WHEREAS, the Oswego County Emergency Management Office, with assistance from Barton & Loguidice, D.P.C., has gathered information and prepared the Multi-Jurisdictional Hazard Mitigation Plan Update, created in 2025 and finalized in 2026, for Oswego County, New York; and

WHEREAS, the Multi-Jurisdictional Hazard Mitigation Plan Update for Oswego County, New York has been prepared in accordance with the Disaster Mitigation Act of 2000 and Title 44 Code of Federal Regulations (CFR), Part 201; and

WHEREAS the 2026 Oswego County Multijurisdictional Mitigation Plan Update identifies mitigation goals and actions to reduce or eliminate long-term risk to people and property from the impacts of future hazards and disasters; and

WHEREAS adoption by the Town/Village/City of _____ demonstrates their commitment to hazard mitigation and achieving the goals outlined in the 2026 Oswego County Multijurisdictional Hazard Mitigation Plan;

NOW THEREFORE, BE IT RESOLVED BY THE _____, NY THAT:

Section 1: The _____ adopts the 2026 Oswego County Multijurisdictional Hazard Mitigation Plan. This plan, approved by the community, may be edited or amended after submission for review, but will not require the community to re-adopt any further iterations. This only applies to this specific plan and does not absolve the community from updating the plan in 5 years.

This resolution was thereupon declared duly adopted on _____.

Fulton, NY 13069
(315) 591-9150

Oswego County Multi-Jurisdictional Hazard Mitigation Plan

Oswego County and its municipalities updated the Oswego County Multi-Jurisdictional Hazard Mitigation Plan, first approved by the Federal Emergency Management Agency in April 2013.

This plan focuses on how the county and local municipalities will reduce or eliminate the loss of life and property damage that can result from natural or man-made hazards.

The Federal Emergency Management Agency (FEMA), through the NYS Department of Homeland Security and Emergency Services Recovery Section, awarded Oswego County a Pre-Disaster Mitigation Grant to update the Oswego County All-Hazards, Multi-Jurisdictional Mitigation Plan beginning in 2022.

Planning was coordinated by the Oswego County Emergency Management Office with a consultant, Barton & Loguidice, D.P.C.

The updated plan can be found here:

https://www.oswegocountyny.gov/departments/public_safety/emergency_management/hazard_mitigation.php

Having an approved hazard mitigation plan allows the county and municipalities to be eligible for mitigation grant funding and other federal programs.

The Disaster Mitigation Act of 2000 (DMA 2000) is federal legislation that establishes a pre-disaster hazard mitigation plan and new requirements for the national post-disaster Hazard Mitigation Grant Program. DMA 2000 encourages and rewards local and state pre-disaster planning, promotes sustainability, and seeks to integrate state and local planning with an overall goal of strengthening statewide hazard mitigation planning. This enhanced planning approach enables local, tribal, and state governments to articulate accurate and specific needs for hazard mitigation, which results in faster, more efficient allocation of funding and more effective risk reduction projects.

Funding Opportunities for municipalities with Approved Hazard Mitigation Plans

- **Hazard Mitigation Grant Program** – post disaster funds based on a percentage of Public Assistance dollars awarded
- **Building Resilient Infrastructure and Communities (BRIC)** – annual grant program (when funded) that funds projects that promote resilient infrastructure, respond to the impacts of climate change, and equip the nation with resources to combat its most pressing threats

Oswego County Hazard Mitigation Plan projects in 2026 update

Some of the projects included in the 2026 mitigation plan update are listed below. A complete listing is available in the jurisdictional annexes on the county's Mitigation web page.

- Install backup generators for County facilities at Pulaski highway garage, Social Services, and Camp Hollis to support critical facilities during power outages
- Implement safety recommendations from the most recent engineering assessment for Curved Dam Lock #7 in the City of Oswego
- Vegetation management program to reduce hazards of tree limbs impacting power lines during severe storms in the City of Oswego and other municipalities
- Flood wall upgrades along Oswego River in City of Fulton
- Backup generator for City of Fulton wastewater treatment plant
- Improvements to the Village of Phoenix sanitary system to make the system more resilient to the effects of flooding and heavy precipitation events
- Stabilization of Spring Brook in the Village of Pulaski to prevent erosion and reduce flood flows

Town of Mexico

This section presents the jurisdictional annex for the Town of Mexico for the 2025 Oswego County Hazard Mitigation Plan (HMP). It includes information and guidance intended to assist public and private entities in reducing losses from future natural hazard events. This jurisdictional annex focuses on actions that can be implemented prior to a natural hazard event to reduce adverse impacts to people and property; it is not intended to serve as guidance for what to do when a natural hazard event occurs or how to recover following a natural hazard event. This jurisdictional annex provides an overview of the community and its critical facilities, evaluates the community's vulnerability to various natural hazards, assesses the community's existing capability to mitigate natural hazards, and identifies actions that could be implemented to mitigate natural hazard risks and, ultimately, reduce damages to people and property resulting from natural hazard events.

1 CONTACT INFORMATION

The primary contacts for Oswego County regarding this Jurisdictional Annex are identified as follows:

- Primary: Eric Behling, Town Supervisor | townsupervisor@mexicony.org, 315-963-7633
- Alternate: Nicole Wild, Town Clerk | townclerk@mexicony.org, 315-963-7633

2 COMMUNITY SNAPSHOT

2.1 Demographics

The 2020 Census estimated that 5,259 people live in the Town of Mexico. The Town's population has increased by 1.2% since the 2010 Census (5,197). The median age in the Town is 44.6 years and 18.6% of the population is over the age of 65. The median household income in the Town is \$62,734.

2.2 Location & Land Characteristics

The Town of Mexico is located in the central portion of Oswego County. It is bordered by the Town of Richland and Lake Ontario to the north, Town of Parish to the east, Towns of Palermo and Hastings to the south, and Town of New Haven to the west. The Town covers approximately 44.17 square miles (this excludes the Village of Mexico). The properties within

the Town have a total assessed value of approximately \$199,743,179, which is distributed across a variety of property classes.

Major transportation corridors in the Town include CR 40, CR 41, CR 58, CR 64, CR 69, and SR 104, as described in Section 2.4 of the main body of the HMP. Key water features within the Town include Lake Ontario, Grays Millpond, Little Salmon River, Snake Creek, and Sage Creek..

2.3 Governing Body

The Town of Mexico is governed by a Town Board consisting of a supervisor and 4 board members.

2.4 Recent and Anticipated Future Development

According to a review of 239 Referrals since the last County HMP (2020), new developments have been approved or proposed within the Town. The proposals that the Town received are summarized in Table 2-1 below. At least 1 of the proposals for the Town are located in the Special Flood Hazard Area (1% annual chance flood event area) or Moderate Flood Hazard Area (0.2% annual chance flood event area). These developments may affect the Town's vulnerability to the hazards identified in this HMP.

Table 2-1. Developments from 2020 to 2023

Date	Request	Location	Applicant	Referring Agency	Decision	Located in 1% or 0.2% Annual Chance Flood Event Area?
9/12/22	Subdivision	Agriculture District	John Jones		No Significant Community Impact	Yes
4/27/23	Site Plan Review Special Use Permit for Storage Units	State Rt 11	Dan Cartier	Ned Waterbury	No Significant Community Impact	No
5/15/23	Special Use Permit Area Variance	County Route 58	RIC Development	Ned Waterbury	Approval	No

3 CAPABILITIES ASSESSMENT

3.1 Planning Mechanisms and Capabilities

The Town of Mexico identified the following planning mechanisms and capabilities that can support the Town in hazard mitigation efforts. These capabilities can be used to support the mitigation strategy in several ways. For example, administrative capabilities can assist in implementing the mitigation actions as identified in the mitigation strategy. Existing building codes and land use regulations provide a foundation for mitigation planning and provide guidelines for infrastructure repair, new developments, and other actions. Educational programs may be developed further in order to more fully incorporate hazard mitigation. Table 3-1 elaborates on existing building codes, land use and development ordinances/regulations, and many other capabilities which can support hazard mitigation.

Table 3-1. Planning Mechanisms & Capabilities

Planning Mechanism	In Place? (Yes/No)	Notes (Does the plan address hazards? Can the capability be used to implement mitigation actions? When was it last updated?)
Administration		
Maintenance Programs	Yes	Storm drainage; ditch; tree maintenance (national grid); highway does some tree work
Mitigation Planning Committee	No	
Mutual Aid or Shared Services Agreements	Yes	With surrounding municipalities
Planning Board	Yes	
Zoning Board	Yes	ZBA
Development Approvals		
Building Code	Yes	NYS Standards
Fire Department ISO Rating	Yes	5/5Y
Site Plan Review Requirements	Yes	Section 335
Funding Resources		
Authority to Levy Taxes	Yes	
Capital Improvement Project Funds	Yes	
Federal Funding Programs (i.e., USDA, FEMA, others)	Yes	ARPA (flooding projects)
General Obligation Bonds and/or Special Tax Bonds	Yes	
Impact Fees for New Development	No	
State Funding Programs (i.e., NYSEFC, NYSOER, NYSEDEC, others)	Yes	Ag and markets
Utility Fees (i.e., water, sewer, stormwater, gas, electric)	Yes	Water and Sewer (Sabill); water districts
Land Use Regulations		
Density Controls	Yes	Section 420

Planning Mechanism	In Place? (Yes/No)	Notes (Does the plan address hazards? Can the capability be used to implement mitigation actions? When was it last updated?)
Flood Insurance Rate Maps	Yes	11/16/23
NFIP Participant	Yes	
Hillside Development Regulations	No	Follows state/building code regulations
Open Space Preservation	Yes	July 1 st state grant ag and markets for farm / forest preservation
Stormwater Management Regulations	Yes	
Streambank Setback Regulations	Yes	
Subdivision Regulations	Yes	Section 562
Zoning Ordinance	Yes	Local Law, 10/19/2010

Natural Resources		
Forest/Vegetation Management	Yes	Upcoming with pending open space plan
Stream Corridor Management	Yes	Soil and water; Cornell;
Stream Dumping Regulations	No	Follows DEC Regulations
Urban Forestry and Landscape Management	No	
Watershed Management	Yes	Watershed Protection Plan
Wetland Regulations	No	Follows DEC Regulations

Plans		
Capital Improvement Plan	No	
Comprehensive Emergency Management Plan	Yes	
Comprehensive Plan	Yes	Joint with Village. Currently updating.
Continuity of Operations Plan	No	
Economic Development Plan	Yes	

Programs/Organizations		
Climate Smart Community	No	
Local Emergency Preparedness /Disaster Response Organizations	Yes	Mexico FD; Ambulance; VFW
Local Environmental Protection Organizations	Yes	Derby Hill Observation;
National Weather Service StormReady Certification	Yes	Via the county
Outreach Programs	Yes	FD at schools; open houses
Partnerships with private entities addressing mitigation or disaster response	No	
School Programs or Adult Educational Programs	Yes	FD at schools; open houses

Staff Positions		
Civil Engineer	Yes	C2AE
Code Enforcement Officer	Yes	
Emergency Manager	Yes	Town Supervisor

Planning Mechanism	In Place? (Yes/No)	Notes (Does the plan address hazards? Can the capability be used to implement mitigation actions? When was it last updated?)
Floodplain Administrator	Yes	Code Enforcement
Planner / GIS Coordinator	Yes	County Planning

Technical Abilities		
Grant Writing	Yes	Internal and contract out;
Hazard Information Centers	No	
Hazard Warning Systems	Yes	HyperReach; Social media via the village; Town/Village website; electronic billboard at village, FD, school.

3.2 Integration of Planning Efforts

The Town of Mexico understands the importance of considering an integrated approach when developing municipal plans, policies, programs, and regulations. The Town intends to reference the 2025 Oswego County HMP as part of the process for future updates to the plans, policies, programs, and regulations listed in Table 3-1, above, and for creating new regulations as applicable. This may include adding hazard mitigation as an agenda item at Town Board meetings where local laws are being developed or updated, including hazard mitigation considerations in any templates used to make new laws, adopting an ordinance that all new local laws need to consider hazard mitigation if applicable, or simply making local officials aware of the need to consider hazard mitigation in any plan updates. Additionally, the Town of Mexico may use the local laws assessment (included in Section 4 of the main body of the HMP) to reference hazard mitigation related regulations that other jurisdictions in the County have adopted, and consider implementing similar regulations if desired.

4 HAZARD IDENTIFICATION AND RISK ASSESSMENT

4.1 Profiled Hazards

The following scale was developed to determine hazard vulnerability for the jurisdiction. Each event was given a ranking from one (1) through three (3) for the severity of impact based on extent, onset warning, impact in damages and injury, and frequency: three (3) represents the greatest impact (large area, no warning, severe damage, and regular occurrence); two (2) represents moderate impact (several locations, hours of warning, moderate damage, and infrequent occurrence); and one (1) represents low impact (one location, days of warning, minor damage, and rare occurrence). The scores for each of these four (4) categories were used to assign an overall vulnerability for each hazard, as follows:

- Low: 5 or less
- Moderate: 6 to 8
- High: 9 or greater

The hazard analysis criteria used to evaluate the Town's vulnerability to each natural hazard are summarized in *Table 4-1*, and the results are presented in *Table 4-2*.

Table 4-1. Hazard Analysis Criteria

Score	Impact (Damage to property, crops, people)	Frequency	Extent	Amount of Warning	Total Score	Overall Vulnerability
1	Minor	Rare	One or two problem areas within the jurisdiction	Days of Warning	4 to 5	Low
2	Moderate	Infrequent	A significant portion of the jurisdiction	Hours of Warning	6 to 8	Moderate
3	Major	Regular	The entire jurisdiction	No Warning	9 to 12	High

Table 4-2. Hazard Vulnerability by Event

Hazard Event	Impact (Damage to property, crops, people, etc.)	Frequency of Occurrence	Extent of Impacts	Amount of Warning	Overall Vulnerability	Jurisdiction Rank	Notes (Anticipated Future Changes)
Severe Thunderstorm/ Windstorm/ Hail	2	3	2	2	9 (High)	1	
Flooding	2	1	1	1	5 (Low)	2	

Extreme Temperatures: The Town did not profile extreme temperatures as a hazard because historical data indicates minimal local impacts on infrastructure, public health, or essential services.

Severe Winter Storms: The Town did not profile severe winter storms as a hazard because it has established response measures and infrastructure that effectively manage typical snowfall and storm impacts.

Ice Storms: The Town did not profile ice storms as a hazard because past events have had minimal impact, and existing mitigation efforts effectively address potential risks.

4.2 Hazard Event History

A complete history of natural hazard events within the County – based on NOAA's Severe Storm Database – is included in Section 6 of the main body of the HMP. The following is a subset of events that occurred specifically within the Town/Village. These records informed the development of mitigation actions by demonstrating which hazards have historically had the greatest impact on the Town.

Table 4-3. Hazard Event Records, 2013-2023

Event Type	Date	Magnitude	Estimated Property Damage	Estimated Crop Damage
Thunderstorm Wind	7/25/1996	-	\$8,000	-
Thunderstorm Wind	8/23/1998	-	\$8,000	
Thunderstorm Wind	7/4/2003	50 kts	\$10,000	
Thunderstorm Wind	8/29/2003	52 kts	\$10,000	
Thunderstorm Wind	8/5/2012	52 kts	\$10,000	
Thunderstorm Wind	6/17/2014	50 kts	\$15,000	
Thunderstorm Wind	5/30/2015	50 kts	\$15,000	
Thunderstorm Wind	8/13/2016	50 kts	\$10,000	
Hail	5/18/2017	2.5 inches	-	
Thunderstorm Wind	8/22/2017	50 kts	\$20,000	
Thunderstorm Wind	10/15/2017	50 kts	\$15,000	
Thunderstorm Wind	8/6/2018	52 kts	\$1,000	
Thunderstorm Wind	10/7/2020	51 kts	\$1,000	-
Thunderstorm Wind	8/29/2022	51 kts	\$2,000	
Total:			\$125,000	None Reported

Note: The table above lists only the hazard events that were recorded as occurring specifically within the Town. For records of County-wide hazard events, see the Oswego County Annex.

4.3 Floodplain Statistics

Key waterways in the Village are described in Section 2.2. FEMA provides flood insurance rate maps for the municipality and GIS data on the spatial location of floodplains. The 1% annual chance (100-year) flood event area generally corresponds with areas that are at high risk of flooding, and the 0.2% annual chance (500-year) flood event area generally corresponds with areas that are at moderate risk of flooding. Out of the 28,267 acres in the Town, approximately

Table 4-5. Estimated Number and Structure Value of Parcels within Floodplains

Property Class	Parcels in 100-Year Floodplain	Approx. Structure Value* in 100-Year Floodplain	Parcels in 500-Year Floodplain	Approx. Structure Value* in 500-Year Floodplain
Agriculture	16	836500	2	9500
Residential	264	28615100	150	12363600
Vacant Land	147	207984	62	86900
Commercial	5	984200	4	385200
Recreation	4	1216200	4	1216200
Community Services	1	0	0	0
Industrial	3	3000	0	0
Public Services	6	887814	3	12900
Parks, forested, conservation	9	179100	3	44000
Total	560	\$32,929,898	228	\$14,118,300

**Structure Value estimated by subtracting parcel Land Assessed Value from Total Assessed Value*

**Parcels in the Village of Mexico excluded.*

4.4 National Flood Insurance Program

Long-term mitigation of potential flood impacts can be best achieved through comprehensive floodplain management regulations and enforcement at a local level. The National Flood Insurance Program (NFIP), regulated by FEMA, aims to reduce the impact of flooding on private and public structures by providing affordable insurance for property owners. The program encourages local jurisdictions to adopt and enforce floodplain management regulations in order to mitigate the potential effects of flooding on new and existing infrastructure (<https://www.fema.gov/flood-insurance>).

Communities that participate in the NFIP adopt floodplain ordinances. If an insured structure incurs damage costs that are over 50% of its market value, the owner must comply with the local floodplain regulations when repairing or rebuilding the structure. A structure could be rebuilt at a higher elevation, or it could be acquired and demolished by the municipality or relocated outside of the floodplain. Insured structures that are located within floodplains identified on FEMA's Flood Insurance Rate Maps (FIRMs) may receive payments for structure and content losses if impacted by a flood event.

The NFIP and other flood mitigation actions are important for the protection of public and private property and public safety. Flood mitigation is valuable to communities because it:

1. Creates safer environments by reducing loss of life and decreasing property damage;
2. Allows individuals to minimize post-flood disaster disruptions and to recover quicker (homes built to NFIP standards generally experience less damage from flood events, and when damage does occur, the flood insurance program protects the homeowner's investment); and
3. Lessens the financial impacts on individuals, communities, and other involved parties (<https://www.fema.gov/flood-insurance>).

The Town of Mexico currently participates in the NFIP (community ID 360654B), and its current FIRM(s) became effective on 11/16/2023. The Town joined the NFIP on this same date. There were no compliance issues identified in this hazard mitigation planning process. The Town will continue to comply with the NFIP by enforcing floodplain management requirements and regulating new development in special flood hazard areas, among other required duties. Staff capabilities to implement the NFIP and local floodplain regulations are listed in Table 3-1 of this annex.

According to NFIP claims data provided by FEMA, there is 1 repetitive loss property in the Town of Mexico. Such properties have had at least two paid flood losses of more than \$1,000 each in any 10-year period since 1978.

4.5 Considerations for Future Hazards

The Town also considered future changes in hazards due to climate change, population changes, land use, and other factors. They identified the following concerns: flash flooding; high winds. These concerns were taken into consideration when developing the mitigation strategy. The effects of climate change and other factors on future hazard events in Oswego County are covered in more detail in Section 6 of the main body of the HMP.

Climate change predictions depend on the amount of global greenhouse gas emissions, as well as other factors. However, based on the [Climate Mapping For Resilience and Adaptation tool](#), it is predicted that Oswego County will experience:

- **More extreme heat** (14 to 20 days per year above 90 degrees Fahrenheit by mid-century [2035-2064], compared with 12 to 17 days per year in modeled history [1976-2005], according to mid-level projections).
- **Slightly more dry days** (4.9 to 6.9 more days per year with no precipitation by mid-century [2035-2064], compared with 1976-2005, according to mid-level projections. Maximum consecutive dry days increases by 0.5 to 0.8 days per year for the same time period).
- **Slightly fewer wet days, but slightly more heavy precipitation events** (4.9 to 6.9 fewer days per year with any precipitation by mid-century [2035-2064], compared with 1976-2005, according to mid-level projections. 5.6 to 6.0 days per year that exceed 99th percentile precipitation by mid-century, compared to 4.1 to 4.2 days per year from 1976-2005; 47.9 to 48.4 inches of average annual total precipitation by mid-century [2023-2064], an additional 2.2 to 2.7 inches per year average annual total precipitation compared with 1976-2005).
- **Fewer cold days** (35.1 to 31.5 days per year with maximum temperature below 32 degrees Fahrenheit by mid-century [2035-2064], compared with 10.8 to 18.1 days per year in modeled history [1976-2005], according to mid-level projections).

Table 5-1. Critical Facilities

Facility Name	Facility Type	Location	Located in 1% or 0.2% Chance Flood Event Area?	Protected to a 0.2% chance flood event or previous worst case flood event (whichever is greater)?	If does not meet this level of protection, identify associated action or explain why infeasible.	Vulnerabilities to Other Hazards	Notes
Mexico Community Park	Park	off of NY-104	No				
Cell Tower	Public Utilities	off of Ames St	No				
Cell Tower (J&J Campgrounds)	Public Utilities	291 Tubbs Rd, Mexico, NY 13114	No				
Verizon Cell Tower	Public Utilities	Munger Hill Rd, across from water tank	No				
National Grid power line corridor	Public Utilities	throughout Town	No				
Spectrum property	Public Utilities	off of NY-69	No				
Town Wells	Public Utilities	off of Pumphouse Rd	Yes	No	Assess the wells and site for resilient retrofit opportunities and assess the property for resilient site improvements.		
Water Tower	Public Utilities	off of Munger Hill Rd	Yes	No	Assess the water tower and site for resilient retrofit opportunities and assess the property for resilient site improvements.		
Town Highway Garage	Municipal Services	784 CR 58, Mexico, NY 13114	No				

Facility Name	Facility Type	Location	Located in 1% or 0.2% Chance Flood Event Area?	Protected to a 0.2% chance flood event or previous worst case flood event (whichever is greater)?	If does not meet this level of protection, identify associated action or explain why infeasible.	Vulnerabilities to Other Hazards	Notes
Citi BOCES	Educational, Shelter and Evacuation Facilities	179 County Rte 64, Mexico, NY 13114	No				
Grays Mills Dam	Dams	off of Czebeniak Rd	N/A				
Harry Nicholson Pond Dam	Dams	off of Sherman Rd	N/A				

For facilities that are not protected to a 0.2% annual chance (500-year) flood event or previous worst case flood event, namely the town wells off of Pumphouse Rd and the water tower off of Munger Hill Rd, associated actions are included in Section 7: Mitigation Strategy and Prioritization.

5.2 High Hazard Potential Dams

The Town of Mexico does not have any high hazard potential dams located within the municipal boundaries.

5.3 Additional Jurisdiction/Public Identified Vulnerabilities

In addition to critical facilities, it is important to take a holistic approach to identifying assets in the jurisdiction and how they may be vulnerable to the hazards identified in the HMP. Examples of other assets considered include:

- People (residents, workers, visiting populations, and socially vulnerable populations like seniors, individuals with disabilities, lower-income individuals, etc.)
- Other structures (community centers, historic places, planned capital improvement)
- Economic assets (major employers, primary economic sectors, key infrastructure like telecommunications networks)
- Natural, historic and cultural resources (areas of conservation, beaches, parks, critical habitats)
- Critical facilities and infrastructure (hospitals, law enforcement, water, power)
- Community activities (major local events such as festivals or economic events like farming or fishing)

The Town of Mexico has not identified any specific additional assets aside from critical facilities listed in Table 5-1, but has taken the above example assets into consideration during the development of this annex.

6 SUMMARY OF HAZARD IMPACTS AND VULNERABILITIES

6.1 Severe Storm

The Town of Mexico has ranked their overall vulnerability to a severe storm event as high, as indicated in Table 4-2. Severe storms occur regularly in the jurisdiction and affect a significant portion of the jurisdiction, causing moderate damage. The jurisdiction gets Hours of Warning for severe storm events.

Records of severe storm events are described in Section 4.2. Impacts to the Town from severe storm events include fallen trees from severe winds, which can damage overhead utility lines, resulting in power outages. These events are likely to result in damages to private and public infrastructure and property. In addition, during severe winter storm events, roadway safety is a primary concern and impacts the safety of residents and operation of critical facilities. Damages to the Town's critical infrastructure or primary transportation routes would be most impactful to residents. Storm damages would primarily impact the more populated portions of the Town. The Town completes tree maintenance within Town road right of ways to minimize potential damages to overhead utility lines. Private utility right-of-ways are generally maintained by individual utility companies.

Future vulnerability to severe storm events remains high, is expected to increase, and may be affected by climate change, land use, and population changes, as described in Section 4.4 of this annex and in Section 6 of the main body of the HMP.

6.2 Flood

The Town of Mexico has ranked their overall vulnerability to a flood event as low, as indicated in Table 4-2. Flood events occur rarely in the jurisdiction and affect one or two problem areas within the jurisdiction, causing moderate damage. The jurisdiction gets Days of Warning for flood events.

Information on flood event records (Section 4.2), high hazard potential dams (Section 5.2), floodplain statistics (Section 4.3), and participation in the NFIP (Section 4.4) are described above, illustrating the impact of flooding on critical facilities and other structures.

Future vulnerability to flood events remains high, is expected to increase, and may be affected by climate change, land use, and population changes, as described in Section 4.4 of this annex and in Section 6 of the main body of the HMP.

6.3 Jurisdictional Priorities

Taking into account the identified natural hazards, potential impacts, assets, and vulnerabilities identified above, key vulnerabilities and priorities to be addressed in this HMP were identified for the Town.

Top concerns about hazard mitigation in the Town included:

- Lake Ontario water levels;
- Flash flooding; and
- High winds.

The following populations were identified as being particularly vulnerable to hazards:

- Seniors (senior housing in village);
- 2 state operated group homes (Sabill and Fravor); and
- The Amish (7-10 families).

The plan was revised to reflect the following changes in community priorities since the 2020 HMP Update:

- The Town has not identified any changes in priorities since the 2020 HMP Update.

Additional concerns that the Town would like addressed in the plan include:

- None identified

6.4 Additional Impacts

Additional impacts of the hazards are summarized in the problem descriptions in Appendix I: New Mitigation Actions – Review spreadsheet.

7 MITIGATION STRATEGY AND IMPLEMENTATION

7.1 Past, Completed, and Ongoing Initiatives

The Town proposed 2 mitigation actions in the 2020 Oswego County HMP Update. The status of each action is summarized in Table 7-1, below.

Table 7-1. Status of 2020 Mitigation Actions

Name	Description	Hazard(s) Mitigated	Lead Agency	Status (Completed, In Progress, No Progress, Discontinued)	Carried into 2025 HMP Update? (Yes/No)
Engineering study of Lake Ontario shoreline	Conduct engineering study to identify highest priority stabilization projects along Lake Ontario shoreline to reduce flooding & erosion	Flood	Town Planning Board*, NYSDC, USACE	No Progress. State intervened.	No; jurisdictional responsibility shifted to another agency
Backup power for Town Hall	Provide backup power for Town Hall (potential shelter location) and Town Highway Dept	All	Town Highway Superintendent*	No Progress	Yes

7.2 New Mitigation Actions

In addition to the actions carried over from the 2020 HMP, the Town of Mexico identified new mitigation actions for inclusion in the 2025 HMP Update, in conjunction with the project team. First, a list of actions was brainstormed based on the capabilities, hazard identification, impacts, and vulnerabilities described above. This included consideration to the ways that the Town of Mexico could expand and improve the identified capabilities to achieve mitigation, as described in Section 3 of this annex. Then, a more comprehensive range of actions were evaluated as described in Section 8 of the main body of the HMP. Finally, actions that tied in most closely with the vulnerabilities identified by the Town were selected for inclusion in the HMP.

The Town proposed 4 new mitigation actions to be included in the 2025 HMP update. These actions are included in Table 7-2 below, and described in more detail in the Mitigation Action – Review spreadsheet (Appendix I).

Table 7-2. New Mitigation Actions

Project #	Project Name	Goal/ Objective being Met	Hazard to be Mitigated	Description of the Problem	Description of the Solution	Related to CF?	EHP Issues*	Estimated Timeline	Lead Agency	Estimated Costs**	Estimated Benefits	Potential Funding Sources	Priority
M1.F1	Stream Maintenance Plan	G2, G3	Flooding	Severe flooding and flash flood events pick up excessive sediment and debris in streams and other waterways and carry them downstream to collect around bridges and culverts, causing blockages and overtopping flows that damage roadways and public infrastructure and threaten to flood buildings.	Create a stream maintenance plan to identify locations where excessive sediment and debris can be washed downstream and educate property owners to perform regular stream maintenance and clearing programs to prevent buildup of debris.	Yes	Maybe – location based action	1 – 3 years	Highway Department	\$\$	This action reduces the flood risk that beaver dams pose during severe thunderstorms to the municipality.	US HMGP, US BRIC, NYS HM RLF, Flood Mitigation Assistance Program, FEMA HHPD Grant Program	High

Project #	Project Name	Goal/ Objective being Met	Hazard to be Mitigated	Description of the Problem	Description of the Solution	Related to CF?	EHP Issues*	Estimated Timeline	Lead Agency	Estimat ed Costs**	Estimated Benefits	Potential Funding Sources	Priorit y
M1.F2	Critical Facility Assessments to Flooding	G3	Flooding	The following facilities/properties are not in the 100/500 year floodplain but are prone to flooding: Town Hall; Mexico Community Park. The Town wells and Water tower are in the 100/500 year floodplains and are not protected.	Assess the following critical facilities/properties for resilient retrofit opportunities and assess the properties for resilient site improvements: Town Hall; Mexico Community Park; town wells; and the Water tower.	Yes	Yes	3 -5 years	Highway Department	\$	Assessing the Town's critical facilities for their level of protection against a 0.2% chance flood event (or previous worst case flood event, if applicable), is a first step to ensuring that these facilities remain operable during and after flooding events, reducing the overall risk to people and infrastructure.	US HMGP, US BRIC, US Flood Mitigation Assistance, US HUD CDBG-MIT, NYS HM RLF	Medium
M1.T1	Backup Generator for critical facility	G2, G3, G4	Severe Thunderstorm (Flooding, Hail, Lightning, Wind) Ice Storm, Snowstorm	The Town of Mexico experiences severe thunderstorms and other events that cause power outages. The Town's McAuslan Hall, a community building that is a potential heating/cooling center or shelter, currently lacks backup power.	Perform an engineering study to determine size of generator needed and hookups; use information to procure a generator for the McAuslan Hall.	Yes	No	1-3 years	Town Supervisor, Highway Department	\$	Ensure continuity of critical operations and emergency shelter availability during a power outage. The Town can reduce personal injury and property damage by ensuring that critical facilities have backup generators and do not lose power.	FEMA BRIC, US CDBG-MIT, US HMGP, NYS HM RLF	Medium
M1.T2	Underground utilities for new development	G2, G3, G4	Severe Thunderstorm (Hail, Lightning, Wind) Ice Storm, Snowstorm	During extreme storm events such as severe thunderstorms, above ground utility lines are at risk of damage from trees, high winds, and extreme temperatures.	Update the local law / zoning code to require underground utilities for new development where flooding is not present.	Maybe - location based action	Maybe - location based action	1 - 3 years	Highway Superintendent, Town Supervisor	\$	Updating local laws/zoning codes to mandate underground utilities for new development enhances resilience in flood-prone areas. This measure minimizes damage risks during extreme weather events, preserves infrastructure integrity, and promotes safer, more sustainable development practices.	US BRIC, SWCD	High

*EHP: Environmental Planning and Historical Preservation.

**Estimated Costs: \$=Low <\$10,000; \$\$=Medium \$10,000-\$100,000; \$\$\$=High >\$100,000.

7.3 Mitigation Action Prioritization

Each of the Town's proposed mitigation actions were evaluated and prioritized according to the criteria listed in Section 8 of the main body of the HMP. This includes a cost-benefit review of the proposed actions.

7.4 Mitigation Action Implementation and Administration

The Town's new mitigation actions will be implemented and administered as described in Section 9 of the main body of the HMP. This section includes additional potential funding sources for consideration by each jurisdiction.

8 ADDITIONAL PUBLIC INVOLVEMENT

Public input was solicited to guide the development of the HMP through two public information meetings and a community survey. A summary of the findings of these outreach activities can be found in Section 3 of the main body of the HMP. The Town of Mexico may continue to seek public participation in hazard mitigation planning after HMP approval by including discussion of the HMP as an agenda item at public Town Board meetings and by offering opportunities for members of the public to participate in the implementation of relevant mitigation actions.

Fw: Proposed project at Citi

Subject: Proposed project at Citi

Hi, Eric -

Apologies for taking this long to get this out to you. I had to fight through the crappy weather and impatient customers at our busiest time of year. Now that we're caught up after Memorial Day, things typically even out for the rest of the year. I'm sure you have your own cycles to deal with, lol.

Attached you'll find a rendering of what we had discussed doing at the site across from Citi. The obelisk in the center would be 12" x 12" x 60" tall with a beveled top for the bronze plaque to be drilled and attached. Cost of the obelisk in a barre gray all memo (unpolished) finish would be \$4690 installed. I'll need to know exactly what you want on the bronze plaque before I can get pricing for you on that. I would use (4) 4" square Woodbury gray posts - less expensive than monument grade stuff - that are roughly 3 ft high to designate the general area around the obelisk. I can get these for \$200 each (my cost). These are thermal 2 (memo)/split 2 (rocky) and could be utilized for chain, rope, cable, or whatever you decide to mark the area with.

Let me know your thoughts after you have a chance to review. I'm usually in our Mexico office on Wednesdays but you can email/call me whenever is convenient.

Thank you!
Jody

Hi Nicole,

I wanted to follow up with a summary of the proposed pricing for the Town of Mexico's new biller portal.

Since the Town will have its own biller ID and dedicated payment portal, it will be billed separately from the Village of Mexico. The proposed pricing would match the Village's current rates:

- **Credit Card:** 3.25% with a \$3.95 minimum fee
- **ACH:** \$3.95 per transaction

In addition, there will be a **\$100 monthly biller portal access fee**. Because the Town will operate under its own biller ID and portal, this monthly fee will be billed directly to the Town, separate from the Village.

If this pricing looks good, please let me know if it makes sense for me to move forward with preparing the official paperwork reflecting these proposed rates.

Best,

Givaughn Beaubrun

Good afternoon,

Yes, thank you Desiray for looking into this for the Town!

My apologies Givaughn, it's a little bit of a complex situation: The Town hires the Village water department because we do not have our own. The Village is NOT allowed to collect Town water bills so that's why I'm here! We have remote access to their Harris water software and would like to "upgrade" my current, clunky little Williamson Law Book workaround for a more formal, efficient online water bill collection platform.

The Town Board approved the attached quote from Harris at their July 13th board meeting but I will need additional approval from them for your portion of the service. We will need to know the billing structure as well. If the service will just be added to the Village of Mexico's current bill, we will need to be able to keep any additional fees for the Town service as separate line items so that the Village can bill our portion of the fees to us.

I would need to know the monthly cost of service plus any additional one-time setup fees to request Town Board approval at our August 10th meeting.

Many thanks,

Nicky
